

The Membership Committee is primarily responsible for recruitment of new members, providing education and information to new members, and serving as resources to existing members with regard to the benefit of their ongoing membership in WPA. The Membership Committee aims to recruit psychologists and other mental health professionals as well as psychology graduate students from diverse parts of the State and in many different areas of practice. In addition to seeking practitioners from different areas of the State, the committee makes substantial efforts to engage graduate students, early career psychologists, and retired psychologists to insure involvement from all levels within the profession.

The committee meets several times throughout the calendar year and is dedicated to providing our members with:

- Information and resources about the benefits of WPA membership;
- Recruitment of new WPA members including outreach activities in the community to raise awareness of the mission and benefit of WPA;
- Review of proposed WPA Committee members to assess and verify interest;
- Act as an ongoing resource for existing members with regard to the benefits associated WPA and how to access them;
